EXPERIMENT 18:

Install Virtualbox/VMware Workstation with different flavours of linux or windows

OS on top of your present windows environment.

Aim

To install VirtualBox and create a virtual machine with a different Linux or Windows operating system on the existing Windows environment.

Short Procedure

1. Download and install Oracle VirtualBox on the Windows system.
2. Download the ISO file of the required Linux/Windows OS.
3. Open VirtualBox and select Create New Virtual Machine.
4. Enter the VM name and select the downloaded ISO file.
5. Allocate suitable RAM, CPU cores, and virtual hard-disk space.
6. Start the virtual machine and follow the OS installation instructions.
7. Complete the installation and restart the virtual machine.
8. Verify that the newly installed OS runs successfully inside the virtual environment.

Step 1:- CREATING VM AND PROVIDING ISO FILE

The screenshot shows the 'Create Virtual Machine' window with the title 'Virtual machine Name and Operating System'. On the left is a decorative image of a potted plant with a blue flower. The main area contains the following fields and options:

- Name:** koushik (with a green checkmark icon)
- Folder:** C:\Users\marak\VirtualBox VMs
- ISO Image:** <not selected>
- Edition:** (empty dropdown)
- Type:** Microsoft Windows
- Version:** Windows 10 (64-bit) (with a Windows 10 64-bit icon)
- ☐ Skip Unattended Installation
- Information icon: No ISO image is selected, the guest OS will need to be installed manually.

At the bottom are buttons for 'Help', 'Expert Mode', 'Back', 'Next', and 'Cancel'.

Step 2:- PROVIDING CREDENTIALS FOR THE VM

The screenshot shows the 'Create Virtual Machine' window with the title 'Summary'. On the left is the same decorative image of a potted plant. The main area contains a summary of the configuration:

The following table summarizes the configuration you have chosen for the new virtual machine. When you are happy with the configuration press Finish to create the virtual machine. Alternatively you can go back and modify the configuration.

Machine Name and OS Type	
Machine Name	koushik
Machine Folder	C:/Users/marak/VirtualBox VMs/koushik
ISO Image	
Guest OS Type	Windows 10 (64-bit)

Hardware	
Base Memory	2048
Processor(s)	1
EFI Enable	false

Disk	
Disk Size	50.00 GB
Pre-allocate Full Size	false

At the bottom are buttons for 'Help', 'Back', 'Finish', and 'Cancel'.

Step 4:-PROVIDING CREDENTIALS FOR THE VM

Step 5 : CREATING VIRTUAL HARD DISK WITH REQUIRED CONFIGURATION

FIG : INSTALLATION OF VM IS FINISHED
