EXPERIMENT -- 21

Install Virtualbox/VMware Workstation with different flavours of linux or windows

OS on top of windows 7 or 8

Aim

To install VirtualBox and create a virtual machine with a different Linux or Windows operating system on the existing Windows environment.

Short Procedure

1. Download and install Oracle VirtualBox on the Windows system.
2. Download the ISO file of the required Linux/Windows OS.
3. Open VirtualBox and select Create New Virtual Machine.
4. Enter the VM name and select the downloaded ISO file.
5. Allocate suitable RAM, CPU cores, and virtual hard-disk space.
6. Start the virtual machine and follow the OS installation instructions.
7. Complete the installation and restart the virtual machine.
8. Verify that the newly installed OS runs successfully inside the virtual environment.

Create Virtual Machine

×

Virtual machine Name and Operating System

Please choose a descriptive name and destination folder for the new virtual machine. The name you choose will be used throughout VirtualBox to identify this machine. Additionally, you can select an ISO image which may be used to install the guest operating system.

Name: koushik

✓

Folder: C:\Users\marak\VirtualBox VMs

▼

ISO Image: <not selected>

▼

Edition:

Selects an ISO image to be attached to the virtual machine or used in unattended installation.

Type: Microsoft Windows

▼

64 10

Version: Windows 10 (64-bit)

▼

☐ Skip Unattended Installation

 No ISO image is selected, the guest OS will need to be installed manually.
